	Total	868	52

Analysis of deaths:

Following key conclusions can be drawn from the analysis of the 45 deaths in the state till yesterday.

1. Deaths in male patients is 73%
2. One death has occurred under the age of 45 years. Maximum 60% deaths occurred in patients above 61 years of age.
3. Out of the 45 until yesterday, about 78% had diabetes, hypertension or other serious illnesses.
4. This analysis underlines the fact that people above 60 and with co-morbidities such as hypertension and diabetes need to take special care of their health.

Out of 17563 laboratory samples, 15808 were negative and 868 have been tested positive for coronavirus until today. 70 patients have been discharged till date after full recovery. 32,521 people are in home quarantine and 3498 people are in institutional quarantine.

A thorough search of citizens who had attended the religious gathering at Banglewali Masjid, Nizamuddin in early March is underway at the level of all districts and municipal corporations. 8 people out of these have been found positive until now in the state. 2 each from these are from Pune, Pimpri-Chinchwad and Ahmednagar, and one each is from Hingoli and Washim.

As per the guidance from Government of India, cluster containment action plan is being implemented in places where clusters of patients have been found in the state. Apart from Mumbai municipal corporation area, this action plan is being implemented in other municipal corporation areas as well. Kalyan municipal corporation has 175 surveillance squads working, and Thane municipal corporation area has 214 squads working. 178 squads have been deployed in Navi Mumbai area. 71 squads in Ahmednagar districts are active and 147 surveillance squads have been deployed in Buldhana district. There are 2855 squads working across the state and surveillance of over 10 lakh population has been done.
